(a) Excess of Births over Deaths.

(b) Excess of interstate and overseas arrivals over departures. Interstate migration relates to recorded movements by rail, sea, and air, and certain special movements by road.

(c) At end of each period. For each date subsequent to the census of 30th June, 1954, the estimated population represents the population ascertained at the census plus natural increase and net migration since that date. As complete records of interstate migration are not available, the estimated population so derived is subject to revision at the next census.

(d) At middle of each period to 1955-56 and at the end of each period thereafter.

(e) Owing to changes in the registration procedure, figures for September and December quarters, 1960, and March quarter, 1961 are not strictly comparable with those for corresponding quarters of other years.

(f) Preliminary figures from Census Field Count - subject to amendment.

n.a. : Not available.

NOTE : Population increase of the State is the sum of natural increase and net migration.
